##### **1. Problem Statement**

In the mystical realm of programming, there exists a magical incantation to reveal hidden words.

Elara, the skilled enchantress, wishes to summon a word using her spell and then reverse its characters to uncover its enchanted reflection.

Write a program that uses the predefined functional interface `Supplier<String>` and a lambda expression to:

Supply (generate) a string, and  
Display its reversed form.

***Input Format***

No input is required from the user.

The string must be supplied internally using a `Supplier<String>`.

Print the reversed version of the supplied string.

Refer to the sample output for formatting specifications.

#### ***Sample Test Case***

        Scanner scanner = new Scanner(System.in);
        String input = scanner.nextLine();
        String reversed = ((ReverseStringFunction) s -> new
StringBuilder(s).reverse().toString()).reverse(input);
        System.out.println(reversed);
